Wagner	Martin	Waldleufer	martin.wagner@fau.de

Goals	Experience Agile/Scrum
	Achieve our defined project mission
	Develop software that is able to visualize the carbon footprint of some machinery / production environments (scenario) under different circumstances (calculations)
	Design a valuable product with functions that the user really uses
Meeting norms	Inform the others if you can't attend
	Everyone shows up on-time
	We do not interrupt each other
	Attend all of the meetings
Working norms	Everyone contributes regularly
	We value quality over quantity
	Lines of comments (well documented) > Lines of Code
	Recommendation: Visual Studio Code
	Testing/Verification (Unit Testing)
Coordination norms	Scrum tools
	People choose what they want to work on, unwanted work gets split up over all team members equally. (managed by Scrum Master)
	Put everything non code related to the google drive folder
	Every job has a responsible person
Communication norms	Email for important things
	GitHub for Code related things
	Slack for organizational and product related discussions
	Protocol of the Meeting (in google drive, like a summary) - writing meeting minutes - documenting decisions
	We check Email at least once a workday
Consideration norms	All important decisions made in the team meeting
	Possibility of a emergency meeting with at least 1 PO, 2 SD
	We discuss disagreement openly
	We vote for a final resolution
Cont. improvement norms	Using the kanban system to track the teams progress
	Using the continuous demo releases to track the improvement of our system
Rewards	To celebrate the achievement of a goal we will meet for a beer (or maybe a cocktail) if possible in person otherwise online
Sanctions	You must raise clear violations of the team contract
	We apologize by writing a 4 line poem about how one will improve themselves (and the meaning of life) and share it with the team!

#	Meeting Day	Comment	Coach	Product Owner	Software Developer	Scrum Master	Release Manager

15	2021-07-21	Retrospective		Olyae, Scheiderer	Everyone else	N/A	N/A
						(Assignments refer to start date / start sprint)	

Product Vision	Project Mission
<p>The vision of this project is to create a (web) application to visualize, compare and analyze the impacts such as global warming, ozone layer depletion, acidification, etc that come from the production, use, and end-of-life of a product or service. We aim to set the highest standards for environmental protection in the industry and urge business partners to share this ambition and cooperate with both customers and suppliers to strive for continual improvement. We calculate the carbon footprint and help our customers to understand the impacts and risks associated with it and offer alternatives.</p> <p>To present those numbers effectively, they need to be visualized. This is where the "Carbon Footprint Visualization" comes in. Salesman can use the visualization to directly show the customers the impact a product has on the environment and how the impact could be reduced with another version. For example, we could possibly convince customers to invest in something that reduces CO2 emissions, which maybe is more expensive now but will payout in the long run by slowing down global warming.</p>	<p>We pursue ambitious goals with regard to resource efficiency and environmental protection, and hence create long-term value by treating people and the environment in a responsible manner. The main objective of our environmental work is to prevent pollution and continually reduce the environmental impact of our activities in order to protect the environment for future generations.</p> <p>To meet these objectives, we will maintain and further develop a culture in which reducing the environmental impact over each product's life cycle is an integral part of our daily work practices.</p>

Term	Definition
Project	Synonym for projects created by Siemens Energy experts at SimaPro
Product	Synonym for the products available in Siemens Energy projects. For example, gas turbine or transformer
Model	Synonym for available models of a product. For example, a 3-phase GSU transformer. All the models are modeled by SimaPro. Detailed information of a model could be found at canvas section in SimaPro
Baseline scenario	Baseline scenario of a product with a default value for its variables
Scenario	The scenario created by changing default values of a model
Canvas	A window in which a scenario of a product is visualized
SimaPro Canvas	A canvas in which a SimaPro model is visualized. its different than the canvas in Carbon Footprint project

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
0								86
7	Real Data & Loginscreen				11		16	70
			Deliver Increment with real data in UI & loginscreen					
			Loginscreen	3		3		
			Integrate data from SimaPro into the User Interface	8		13		
8	Refactoring & Researching				0		0	70
			No new features are delivered					
9	User Interface				11		14	56
			Deliver Increment with improved and nicer User Interface					
			Siemens Energy Color Scheme	3		3		
			Properly formatting details page	8		8		
			Usage of empty space after closing sidebar			3		
10	User Interface improvements				9		9	47
			Deliver Increment with close & return buttons					
			Return to product grid button	3		3		
			Close comparison buttons	3		3		
			"Forgot password"-Screen			3		
11	Dashboard, PDF & Real Data				21			26
			Deliver Increment with a fancy Dashboard, real data in the graphs & a PDF export function					
			Export graphs as PDF	8				
			Integrate data from SimaPro into the graphs	8				
			First screen after login (Dashboard)	5				
12	Hierachrcal Integration & Changing Variables				16			10
			Deliver Increment with the correct project structure & a way to change variables					
			Changes variables and update graphs					
			Integration of the projects into the hierarchical structure	8				
13	Takeover preparation				10			0
			Prepare the project to be overtaken by Siemens Indian SD Team

Technical Documentation	https://github.com/amosproj/amos-ss2021-carbon-footprint/wiki/Technical-Documentation

Sprint	Status	Source	Impediment	Resolution
4	Resolved	Industry Partner	Connection/motivation from the industry partner with SDs missing	Industry Partners join next team meeting (05-12)
4	Resolved	Industry Partner	Unclear requirements from the industry partners (technologies)	Weekly meetings with their SDs from India
5	Resolved	Team	Too many SDs assigned for the same tasks	Improve communication (One person responsible for issue, you need to communicate with this person if you want to work on the issue)
5	Resolved	SDs	Commits are too large	Split large commits in few smaller commits
5	Resolved	SDs	Libraries not been added to BOM and in the Readme file	Add to team contract
6	Resolved	SDs	No enough mutual understanding of each other's code	-At least one person have to review the code -Assign two people to each issue for pair programming -Rotate partners
7	Resolved	Industry Partner	Dev team from the industry partner showing up late or not at all to negotiated meetings.	We try to put our industry partner in cc, whenever contacting the Dev team, and try to do more communication via email.
7	In-work	Team	Mysterious Martins (Not everyone showed up to the meetings with image data)	Pictures will be provided after receipt of the Team T-Shirts.
7	Resolved	SDs / Source Code	There is a lot of noise in the commits, as still some frontend files are not yet prettified.	Prettier has been applied to all frontend code files. Team members that did not use prettier yet has been offered a helping hand in setup.
7	Resolved	SDs	A lot of work went into the backend, and we now found out that it might be replaced in the end.	This situation will not directly affect grading, as agile Methods are being graded. So the team should just focus on frontend tasks at hand.
8	In-work	Team	"Lets meet for a beer or something in July"	A doodle for this meeting will be created at some point in June.
9	Resolved	SDs	Discussion about feature and branching in the beginning of the sprint	Have a short SD meeting after sprint meeting, same day
9	Resolved	SDs	To make sure if CI pipeline is working for all the commits	Not ignore CI pipeline warnings while committing
9	Resolved	SDs	Not enough interaction about backened working functionality	Have a meeting with the backened developers, pair programming if needed to understand better
10	In-work	POs	focusing on the most prioritized issues	Picking the top most Issue in product backlog
10	In-work	SDs	which "Martin" are you refering to? Mr "Wagner" or Mr "Dürch"?	Mentioning the whole name to not be mistaken
10	In-work	SDs	Time of meetings are often late at the evening! so I can't attend.	Arranging the meetings a bit sooner
