| Goals	Experience Agile/Scrum
	Achieve our defined project mission
	Develop software that is able to visualize the carbon footprint of some machinery / production environments (scenario) under different circumstances (calculations)
	Design a valuable product with functions that the user really uses
Meeting norms	Inform the others if you can't attend
	Everyone shows up on-time
	We do not interrupt each other
	Attend all of the meetings
Working norms	Everyone contributes regularly
	We value quality over quantity
	Lines of comments (well documented) > Lines of Code
	Recommendation: Visual Studio Code
	Testing/Verification (Unit Testing)
Coordination norms	Scrum tools
	People choose what they want to work on, unwanted work gets split up over all team members equally. (managed by Scrum Master)
	Put everything non code related to the google drive folder
	Every job has a responsible person
Communication norms	Email for important things
	GitHub for Code related things
	Slack for organizational and product related discussions
	Protocol of the Meeting (in google drive, like a summary) - writing meeting minutes - documenting decisions
	We check Email at least once a workday
Consideration norms	All important decisions made in the team meeting
	Possibility of a emergency meeting with at least 1 PO, 2 SD
	We discuss disagreement openly
	We vote for a final resolution
Cont. improvement norms	Using the kanban system to track the teams progress
	Using the continuous demo releases to track the improvement of our system
Rewards	To celebrate the achievement of a goal we will meet for a beer (or maybe a cocktail) if possible in person otherwise online
Sanctions	You must raise clear violations of the team contract
	We apologize by writing a 4 line poem about how one will improve themself (and the meaning of life) and share it with the team!

Product Vision	Project Mission
The vision of this project is to create a (web) application to visualize, compare and analyze the impacts such as global warming, ozone layer depletion, acidification, etc that come from the production, use, and end-of-life of a product or service. We aim to set the highest standards for environmental protection in the industry and urge business partners to share this ambition and cooperate with both customers and suppliers to strive for continual improvement. We calculate the carbon footprint and help our customers to understand the impacts and risks associated with it and offer alternatives. To present those numbers effectively, they need to be visualized. This is where the "Carbon Footprint Visualization" comes in. Salesman can use the visualization to directly show the customers the impact a product has on the environment and how the impact could be reduced with another version. For example, we could possibly convince customers to invest in something that reduces CO2 emissions, which maybe is more expensive now but will payout in the long run by slowing down global warming.	We pursue ambitious goals with regard to resource efficiency and environmental protection, and hence create long-term value by treating people and the environment in a responsible manner. The main objective of our environmental work is to prevent pollution and continually reduce the environmental impact of our activities in order to protect the environment for future generations. To meet these objectives, we will maintain and further develop a culture in which reducing the environmental impact over each product's life cycle is an integral part of our daily work practices.

Term	Definition
Project	Synonym for projects created by Siemens Energy experts at SimaPro
Product	Synonym for the products available in Siemens Energy projects. For example, gas turbine or transformer
Model	Synonym for available models of a product. For example, a 3-phase GSU transformer. All the models are modeled by SimaPro. Detailed information of a model could be found at canvas section in SimaPro
Baseline scenario	Baseline scenario of a product with a default value for its variables
Scenario	The scenario created by changing default values of a model
Canvas	A window in which a scenario of a product is visualized
SimaPro Canvas	A canvas in which a SimaPro model is visualized. its different than the canvas in Carbon Footprint project

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn- Down
0								83
2	**Basic User Interface**						5	78
			Deliver first increment with basic User Interface Design					
			Basic UI Design	5		5		
3	**Visualization & Backend**				10		13	65
			Deliver increment with initial backend setup and basic navigation					
			React.js initial setup	5		8		
			Navigate through different Categories and display the corresponding Products (and their Models) as a List (No real Data, only dummy list)	5		5		
4	**SimaPro API & User Interface**				29		29	36
			Deliver increment with improved navigation, initial canvas and visualization					
			Receive data from SimaPro API	8		8		
			See the overview of products in a grid	8		8		
			Select a model and set canvas up	5		5		
			Visualize a scenario	8		8		
5	**Restructure & User Interface**				12		12	24
			Deliver Increment with uniform Interface and first comparison method					
			Restructure GitHub branches and folder structure	2		2		
			Uniform User Interface	5		5		
			Add second canvas	5		5		
6	**Real Data & Report**				24			0
			Deliver Increment with real data, export function and compatibility to different screen sizes					
			Integrate data from SimaPro into the User Interface	8				
			Export graphs as PDF	8				
			Compatibility with different screen sizes (especially mobile devices)	8		5

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
0								99
7	**Real Data & Report**				**16**			83
			Deliver Increment with real data & export function					
			Export graphs as PDF	8				
			Integrate data from SimaPro into the User Interface	8				
8	**Login UI**							67
			Deliver Increment with Loginscreen & "Forgot password"-Screen		**16**			
			Loginscreen					
			"Forgot password"-Screen					
9	**"Dashboard"-Page**				**13**			54
			Deliver Increment with a good looking "Dashboard"-Page					
			"Dashboard"-Page					
			Recently Viewed Items					
10	**Search Products/Models**				**18**			36
			Deliver Increment with an easy way to find the searched Product					
			Product Search					
			Product Filter					
			Favorite Products/Scenarios					
11	**World-map selection**				**13**			23
			Deliver Increment with a way to select model location using a world map					
			Filter Models based on location					
			Find Models of a specific location by pressing on the world map					
12	**"Get started"-Pages**							10
			Deliver Increment which assits first time user		**13**			
			Present most important features					
			Explain how to use the features					
13	**Takeover preparation**				**10**			0
			Prepare the project to be overtaken by Siemens Indian SD Team					

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down

Burndown Chart

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	Documentation for that feature is done	No severe bugs open	No severe bugs open
	Feature branch has been merged	Implemented features are distributed to every branch	User manual is available
	Code has been reviewed by at least one other team member	100% unit tests passed	Documentation has been peer reviewed
	Unit tests are written	Code is in a clean state	On the final project release: additional documentation has been added to unfinished features
		Prettier extension is applied to all code files

Software Build and Deployment Document	https://github.com/amosproj/amos-ss2021-carbon-footprint/blob/main/README.md
User Documentation	https://github.com/amosproj/amos-ss2021-carbon-footprint/wiki/User-Documentation
Technical Documentation	https://github.com/amosproj/amos-ss2021-carbon-footprint/wiki/Technical-Documentation

Sprint	Status	Source	Impediment	Resolution
4	Resolved	Industry Partner	Connection/motivation from the industry partner with SDs missing	Industry Partners join next team meeting (05-12)
4	Resolved	Industry Partner	Unclear requirements from the industry partners (technologies)	Weekly meetings with their SDs from India
5	Resolved	Team	Too many SDs assigned for the same tasks	Improve communication (One person responsible for issue, you need to communicate with this person if you want to work on the issue)
5	Resolved	SDs	Commits are too large	Split large commits in few smaller commits
5	Resolved	SDs	Libraries not been added to BOM and in the Readme file	Add to team contract
6	In-work	SDs	No enough mutual understanding of each other's code	-At least one person have to review the code -Assign two people to each issue for pair programming -Rotate partners
7	In-work	Industry Partner	Dev team from the industry partner showing up late or not at all to negotiated meetings.	
7	In-work	Team	Mysterious Martins (Not everyone showed up to the meetings with image data)	Pictures will be provided after receival of the Team T-Shirts.
7	Resolved	SDs / Source Code	There is a lot of noise in the commits, as still some frontend files are not yet prettified.	Prettier has been applied to all frontend code files. Team members that did not use prettier yet has been offered a helping hand in setup.
7	In-work	SDs	A lot of work went into the backend, and we now found out that it might be replaced in the end.	This situation will not directly affect grading, as agile Methods are being graded. So the team should just focus on frontend tasks at hand.
